PERMIT

<p>In accordance with the laws and regulations of the State of New Jersey, the Department of Environmental Protection hereby grants this permit to perform the activities described below. This permit is revocable with due cause and is subject to the limitations, terms and conditions listed below and on the attached pages. For the purpose of this document, "permit" means "approval, certification, registration, authorization, waiver, etc." Violation of any term, condition or limitation of this permit is a violation of the implementing rules and may subject the permittee to enforcement action.</p>		Approval Date DEC 23 2013
		Expiration Date DEC 22 2018
Permit Number(s) 1427-13-0004.1 FWW130001	Type of Approval(s) FWGP2 underground utility	Enabling Statute(s) NJS 13:9B FWW NJS 58:16A FH NJS 58:10A-1 POLLUTION
<p>Permittee: NJ American Water Company 120 Raider Blvd. Hillsborough, N.J. 08804</p>	<p>Site Location: Block: 102; Lots: 17 and 18 Municipality: Mount Olive Township County: Morris</p>	
<p>Description of Authorized Activities</p> <p>This permit authorizes the disturbance of approximately 3,430 square feet (0.08 of an acre) of wetland transition area under a Freshwater Wetlands General Permit No. 2. The project entails the installation of approximately 375 feet of water main to close a loop in the existing New Jersey American Water Company's water system.</p>		
		
<p>Prepared by: <i>Susan Michniewski</i> Susan Michniewski</p>	<p>Received and/or Recorded by County Clerk</p>	
<p>THIS PERMIT IS NOT EFFECTIVE AND NO CONSTRUCTION APPROVED BY THIS PERMIT, OR OTHER REGULATED ACTIVITY, MAY BE UNDERTAKEN UNTIL THE APPLICANT HAS SATISFIED ALL PRE-CONSTRUCTION CONDITIONS AS SET FORTH HEREIN.</p>		
<p>This permit is not valid unless authorizing signature appears on the last page.</p>		

CONDITIONS APPLICABLE TO ALL LAND USE PERMITS:

1. In accordance with the applicable regulations, any person who is aggrieved by this decision or any of the conditions of this approval may request a hearing within 30 days after notice of the decision is published in the DEP Bulletin. This request must include a completed copy of the Administrative Hearing Request Checklist. The DEP Bulletin is available through the Department's website at <http://www.nj.gov/dep/bulletin> and the Checklist is available through the Division's website at <http://www.nj.gov/dep/landuse/forms/lurpaahr.pdf>. In addition to your hearing request, you may file a request with the Office of Dispute Resolution to engage in alternative dispute resolution. Please see the website www.nj.gov/dep/odr for more information about this process;
2. The permittee, its contractors and subcontractors shall comply with all conditions of this permit, supporting documents and approved drawings; and
 - i. Plans and specification in the application and conditions imposed by this permit shall remain in full force and effect so long as the proposed development or any portion thereof is in existence, unless modified by the Department in writing;
 - ii. If this permit contains a condition that must be satisfied prior to the commencement of construction, the permittee must comply with such condition(s) within the time required by the permit or, if no time specific requirement is imposed, then within six months of the effective date of the permit, or provide evidence satisfactory to the Department that such condition(s) cannot be satisfied; and
 - iii. Any noncompliance with this permit constitutes a violation, and is grounds for enforcement action, as well as suspension and/or termination of the permit; This approval does not in any way affect the right of the State to seek and collect monetary penalties or to take other enforcement action, should it be determined that a violation has occurred onsite;
3. It shall not be a defense for this permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit;
4. The permittee shall take all reasonable steps to prevent, minimize or correct any adverse impact on the environment resulting from activities conducted pursuant to the permit, or from noncompliance with the permit;
5. The issuance of this permit shall in no way expose the State of New Jersey or the Department to liability for the sufficiency or correctness of the design of any construction, structure or structures. Neither the State nor the Department shall, in any way, be liable for the loss of life or property which may occur by virtue of the activity of development resulting from any permit;
6. The permittee shall immediately inform the Department of any unanticipated adverse effects on the environment not described in the application or in the conditions of this permit. The Department may, upon discovery of such unanticipated adverse effects, and upon the failure

of the permittee to submit a report thereon, notify the permittee of its intent to suspend the permit;

7. This permit can be modified, suspended or terminated for cause. The filing of a request to modify an issued permit by the permittee, or a notification of planned changes or anticipated noncompliance does not stay any condition of this permit;
8. This permit does not convey any property rights of any sort, or any exclusive privilege;
9. A copy of the permit and other authorizing documents including all approved plans and drawings shall be maintained at the authorized site at all times and made available to Department representatives or their designated agents immediately upon request.
 - i. The permittee shall also furnish to the Department within a reasonable time any information that the Department requests to determine compliance with this permit or to determine whether cause exists for suspension or termination of this permit; and
 - ii. The permittee shall also furnish to the Department, upon request, copies of records required to be kept by the permit;
10. The permittee shall allow an authorized representative of the Department, upon notification under current rule and upon the presentation of credentials, to:
 - i. Enter upon the permittee's premises where a regulated activity is located or conducted, or where records must be kept under the conditions of this permit;
 - ii. Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit; and
 - iii. Inspect at reasonable times any facilities, equipment, practices or operations regulated or required under the permit. Failure to allow reasonable access under this section shall be considered a violation of this chapter and subject the permittee to enforcement action;
 - iv. Sample or monitor at reasonable times for the purposes of assuring compliance with applicable rules;
11. No change in plans or specifications upon which this permit is issued shall be made except with the prior written permission of the Department;
12. The permittee shall provide reports to the Department as follows:
 - i. Monitoring results shall be reported at the intervals specified elsewhere in this permit;
 - ii. The permittee shall immediately report to the Department by telephone at (877) 927-6337 any noncompliance that may endanger health or the environment. In addition, the permittee shall report all noncompliance to Bureau of Coastal and Land Use Compliance and Enforcement, 401 E. State Street, 4th Floor, P.O. Box 420, Mail Code: 401-04C, Trenton, NJ 08625, in writing within five business days of the time the permittee becomes aware of the noncompliance. The written notice shall include: a description of the noncompliance and its cause; the period of noncompliance, including exact dates and times, and, if the noncompliance has not been corrected, the anticipated length of time it

- is expected to continue; and steps taken or planned to reduce, eliminate and prevent recurrence of the noncompliance. Such notice shall not, however, serve as a defense to enforcement action if the project is found to be in violation of this chapter;
- iii. Where the permittee becomes aware that it failed to submit any relevant facts in an application, or submitted incorrect information in an application or in any report to the Department, it shall promptly submit such facts or information;
13. Development which requires soil disturbance, the creation of drainage structures, or changes in natural contours shall conduct operations in accordance with the latest revised version of "Standards for Soil Erosion Sediment Control in New Jersey," promulgated by the New Jersey State Soil Conservation Committee, pursuant to the Soil Erosion and Sediment Control Act of 1975, N.J.S.A. 4:24-42 et seq. and N.J.A.C. 2:90-1.3 through 1.14. and must obtain any required approvals from the local Soil Conservation District;
 14. If any condition of this permit is determined to be legally unenforceable, modifications and additional conditions may be imposed by the Department as necessary to protect the public interest;
 15. This permit is not transferable to any person unless the transfer is approved by the Department;
 16. The permittee must obtain any and all other Federal, State and/or Local approvals. Authorization to undertake a regulated activity under these rules does not indicate that the activity also meets the requirements of any other rule, plan or ordinance. It is the applicant's responsibility to obtain all necessary approvals for a proposed project;
 17. While the regulated activities are being undertaken, neither the permittee nor its agents shall cause or permit any unreasonable interference with the free flow of a regulated feature by placing or dumping any materials, equipment, debris or structures within or adjacent to the regulated area. Upon completion or abandonment of the work, the permittee and/or its agents shall remove and dispose of in a lawful manner all excess materials, debris, equipment, silt fences and other temporary soil erosion and sediment control devices from all regulated areas. Only clean non-toxic fill shall be used where necessary;
 18. All excavated material and dredge material shall be disposed of in a lawful manner. (For example, it should be placed outside of any flood hazard area, riparian zone, regulated water, freshwater/coastal wetlands and adjacent transition area, and in such a way as to not interfere with the positive drainage of the receiving area);

CONDITIONS APPLICABLE TO THE SPECIFIC PROJECT:

19. This permit authorizes the disturbance of approximately 3,430 square feet (0.08 of an acre) of freshwater wetland transition area for the installation of a water main under Freshwater Wetlands General Permit No. 2. Any additional disturbance of freshwater wetlands, State open waters or transition areas shall be considered a violation of the Freshwater Wetlands Protection

Act unless a permit is obtained from the Division of Land Use Regulation (Division) prior to the start of the disturbances.

20. The Division has determined that the freshwater wetland areas designated by the "B" and "C" points are classified as Intermediate resource value and have a standard required transition area of 50 feet. The wetland area designated by the "A" points is classified as Ordinary resource value. There is no standard transition area required adjacent to Ordinary resource value wetlands. Note that the Division has not verified the location of wetlands as depicted on the approved plan.

21. All excavation within the wetland transition area shall be backfilled to the preexisting elevation. In addition, the uppermost 18 inches of the excavation shall be backfilled with the original topsoil material, where feasible.

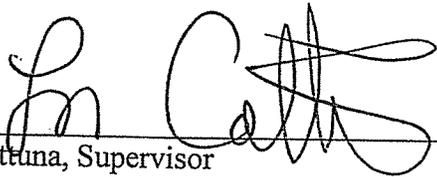

22. While no disturbance to any watercourse is proposed for this project, in order to protect the trout fisheries resource within the tributary to Wills Brook, any activity outside a watercourse which would likely introduce sediment into the watercourse and/or increase its turbidity is prohibited between March 15 and June 15 of each year. The Department reserves the right to suspend all regulated activities onsite should it be determined that the applicant has not taken proper precautions to ensure continuous compliance with this condition.

23. Portions of the proposed project are located within the riparian zone of the tributary to Wills Brook and a Flood Hazard Area Permit is required prior to the start of regulated activities. The Division has determined that the project qualifies for a permit-by-rule at N.J.A.C. 7:13-7.2(a)2 and no written flood hazard area approval is required for the activity. The Flood Hazard Area Control Act Rules can be found on the Division's web site at www.state.nj.gov/dep/landuse.

24. Please be advised that this property is located within the Highlands Planning Area, as defined in N.J.S.A. 13:20-7, and that the municipality or municipalities in which the proposed project is located may be "conforming" with respect to the Regional Master Plan ("RMP"), as defined in the Highlands Water Protection and Planning Act, ("the Act"). Therefore, any project proposed on this property may be subject to the requirements of the Act and/or the RMP. In addition to wetlands, transition areas and flood hazard areas, the Act, the RMP, and any changes thereto, as well as any local ordinances that may have been adopted by the municipality or municipalities in which the proposed project is located, may establish additional environmental limitations that could affect development of this property. As such, the issuance of this permit by the NJDEP Division of Land Use Regulation should not be construed as an indication that this project meets any municipal or Highlands Council requirements which may apply to the site.

25. The drawing hereby approved is one (1) sheet prepared by Gannett Fleming, dated October 2013, with an undated revision entitled "address NJDEP comments 11-25-2013", and entitled: "New Jersey American Water, Mount Olive, New Jersey, International Trade Zone 12" Loop Closure, Construction Plan", Sheet No. 3 of 5.

If you need clarification on any section of this permit or conditions, please contact our Technical Support Call Center at (609) 777-0454.
