EnergySolve reports in the last month:

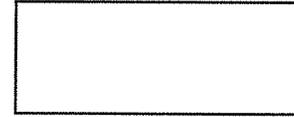

5 Municipalities & 2 Counties Adopt NJ Energy Tracking System: Learn Why.

Financial savings and environmental sustainability for governmental entities are responsible for the increased adoption.

- "The New Jersey Energy Tracking System will allow us to make sure we are paying our bills efficiently and only paying for what we use. The system will allow us to benchmark our facilities and identify energy efficiency projects that could produce significant monetary and environmental savings for our taxpayers without expending any of our own funds" - Councilwoman Priscilla Reilly, Chairwoman of Spring Lake's Green Team
- "You can't manage what you can't measure." - Hammington Mayor Stephen DiDonato

New Jersey Energy Tracking System is used by the State of New Jersey and offered to governmental entities under the Cooperative Purchasing Agreement (T-2605).

Lower Your Utility Costs In 90 Days!

Learn how NJ ETS can:

- Save you money
- Lower your utility costs
- Provide automatic updates to ENERGY STAR Portfolio Manager

Lets Connect:

I look forward to speaking with you, and sharing how you can use the New Jersey Energy Tracking System to save money and manage your utilities more effectively.
