Subject: Morris County Report Announcement

Dear Morris County Municipal Administrators, Clerks, Planning Board Secretaries/Land Use Administrators and Planners:

The Morris County Planning Board has just released the 2013 State of the County Report. This report updates and summarizes existing county-wide planning conditions into a single comprehensive document and contains recent county data on population and housing, land use and development regulations, water supply and wastewater treatment, circulation, open space and farmland, employment, employers and income, historic preservation, education and cultural facilities. General trends and issues related to these subjects are also identified. This overview of conditions, trends and issues provides a regional perspective which may help inform both local and county governments and aid in the planning and policy decision-making process. The report is posted on the Morris County Department of Planning and Development website at www.morrisplanning.org
