**Re: Mount Olive Twp Water Dept Carlton Hills
Limited Firm Capacity to supply future development
PWSID NO. NJ1427014**

Dear Tim Quinn:

The Bureau of Water System Engineering (Bureau) recently updated the Division of Water Supply and Geoscience's Public Water System Deficit/Surplus Table for your water system (available on the web at <http://www.nj.gov/dep/watersupply/pws.htm>). The deficit/surplus evaluation includes supply or demand provided by bulk purchase contracts that are current and approved by the Bureau of Water Allocation and Well Permitting and specify / guarantee minimum and maximum daily, monthly and annual purchase quantities. These guaranteed amounts are applied as a credit (supply) to the receiving system and as a debit (demand) to the supplying system. According to that Table, the Mount Olive Twp Water Dept Carlton Hills has an available spare Firm Capacity of 0.50 MGD or less.

Your existing surplus Firm Capacity may be enough for many future developments or only allow a very limited number of projects. Obviously this all depends upon the amount of your surplus and the water demand associated with any future projects. **The Bureau is therefore advising Mount Olive Twp Water Dept Carlton Hills that applications for Water Main Extension or connection permits with an associated demand that exceeds the system's remaining surplus firm capacity or monthly or annual allocation will not be accepted.**

Should you have any questions concerning this matter, please contact Laura Norkute at (609) 292-2957 or by e-mail at Laura.Norkute@dep.state.nj.us. When contacting the Department, please reference the PWSID No. NJ1427014 and Letter No. WCP140002.

Sincerely,

Laura Norkute
Bureau of Water System Engineering
