Power the dream

Jersey City Back-to-School Festival Internet Essentials Launch Event

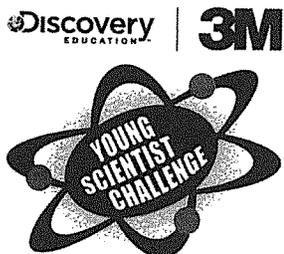

In Jersey City, about 2,000 people gathered at Freedom Field in Liberty State Park, to celebrate the I Love Jersey City Public Schools Back-to-School Festival, against a backdrop of the Statue of Liberty. The day was filled with entertainment, kids' activities, food and information to help families navigate through the new school year. The event was also an opportunity for Comcast to launch year three of Internet Essentials (IE), the nation's largest and most comprehensive broadband adoption initiative for low-income families.

Superintendent Marcia Lyles attended and also stopped by the IE tent. Comcast's IE 2012 launch event with Jersey City Public Schools was one of her inspirations for the day's larger festival at Freedom Field. Comcast Manager of Government Affairs Molly Adams spoke about IE during an interview by JCTV1 - the government access television channel jointly operated by Snyder High School and the city of Jersey City.

Comcast Joins Discovery Education and 3M in Young Scientist Challenge

Comcast has joined Discovery Education and 3M Corporation to encourage top young scientists in the region to enter the 2014 Discovery Education 3M Young Scientist Challenge, the nation's premier science competition for grades 5-8. Ten national finalists will each participate in an exclusive summer mentorship experience with a 3M scientist and compete for \$25,000 and the title of "America's Top Young Scientist." For more information visit www.youngscientistchallenge.com.

Comcast and NBCUniversal Named Among America's 'Best Places to Work' for LGBT People for Second Year in a Row

Comcast and NBCUniversal have, for the second year in a row, been named among the nation's "best places to work" for lesbian, gay, bisexual and transgender (LGBT) people, and earned a 100 percent score on the Human Rights Campaign's 2014 Corporate Equality Index.

This honor recognizes the company's sustained leadership, and is considered the trusted benchmark measuring America's top workplaces and their inclusion of LGBT employees.

"This ranking reflects our ongoing efforts to be the employer of choice for the LGBT community," said Maria G. Arias, Comcast Executive

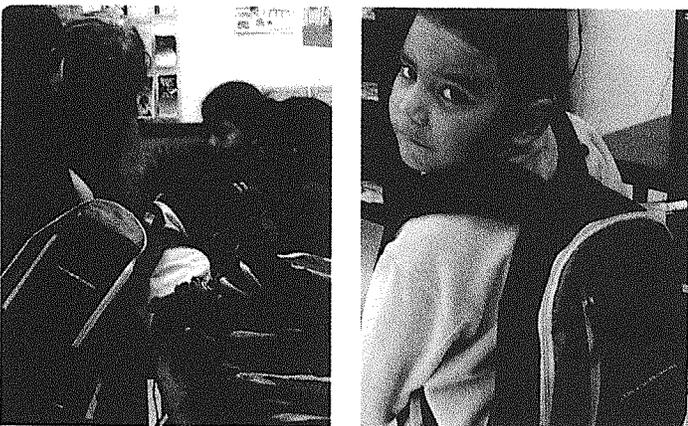

Director of Diversity and Inclusion. "Our company recognizes that having a diverse, inclusive and valued workforce is not just the right thing to do, but is the best way to run a business. By fostering inclusion, our employees are encouraged to share their diverse perspectives, experiences, cultures, and ideas which help drive innovation in our products, services and entertainment."

For more background on diversity and inclusion at Comcast and NBCUniversal, please visit www.comcast.com/diversity and <http://diversity.nbcuni.com/>.

United Way of Greater Union County Stuff the Bus Program

The Connection for Women & Families Executive Director Peggy McHugh Hagen (far right) with Comcast Director of Community Investment Kimberly Smith (2nd from right) and United Way of Greater Union County Senior Vice President and Chief Operating Officer Debbie Ann Anderson (3rd from right) joined staff members and Summit area students.

Students at the Plainfield Family Success Center received backpacks from Comcast.

Comcast was proud to support the United Way of Greater Union County's (UWGUC) Stuff the Bus initiative. The program is an effort by UWGUC to work with corporate and community partners who donate school supplies that are compiled into "ready to learn" backpacks, full of paper, pencils, crayons, rulers and folders, and distributed to area children through local nonprofit partners.

Comcast provided 300 backpacks to United Way to help support the effort. Each backpack included literature about the Internet Essentials program, the nation's largest and most comprehensive broadband adoption initiative for low-income families.

The backpacks were distributed by multiple organizations throughout Union County, including:

The Plainfield Board of Education's Family Success Center

The Connection for Women & Families in Summit

Communities in Cooperation in Linden

Prevention Links in Roselle

Homefirst in Plainfield

Hope, Inc. in Hillside

As part of the initiative, the Plainfield Family Success Center - operated by the Plainfield Board of Education - held an open house for neighborhood families who could drop in and pick up backpacks for the new school year.

Statewide Hispanic Chamber of Commerce Annual Conference

The Statewide Hispanic Chamber of Commerce held their annual conference at New Jersey City University in Jersey City. Comcast representatives were on hand to talk about Internet Essentials, Comcast Business Services and Comcast Spotlight with hundreds of Hispanic business and community leaders. To help bridge the digital divide in America, Comcast developed Internet Essentials, the nation's largest and most comprehensive broadband adoption initiative for low-income families.

Comcast and Khan Academy Announce Multi-Year, Multi-Million Dollar Partnership to Help Close the Digital and Educational Divide

Comcast's Executive Vice President David L. Cohen and Salman Khan, founder of the non-profit Khan Academy, announced a comprehensive partnership that will combine the free, world-class educational content of Khan Academy with the transformative potential of Internet Essentials, the nation's largest and most comprehensive broadband adoption program.

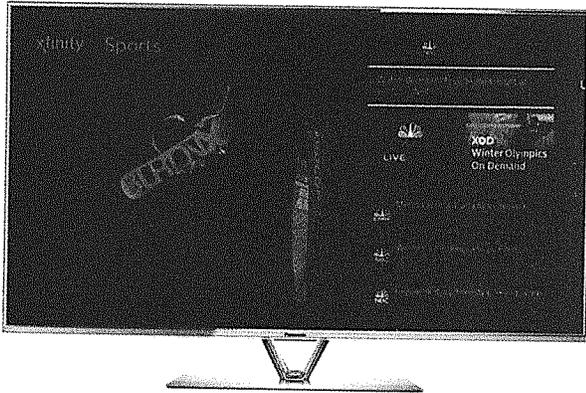

For Comcast, this is one of the largest commitments the Company has made to a non-profit partner. The commitment includes hundreds of thousands of PSAs, significant digital promotion in both English and Spanish, as well as multiple joint promotion opportunities around the country over the next few years.

"While Comcast has made great progress connecting more than 1.2 million low-income Americans, or more than 300,000 families, to the Internet through our Internet Essentials program, there are many more families who are still eligible to participate, but have

not yet signed up," said Cohen. "Research consistently shows that the number one barrier to broadband adoption is a bucket of digital literacy issues, including a lack of understanding of the relevancy of the Internet and of the value it provides. Khan Academy is uniquely positioned to help lower that barrier because its content is the ultimate proof point of the value of the Internet."

In a survey by Comcast of its Internet Essentials program subscribers, 98 percent indicated their kids use the Internet for homework and 94 percent feel that Internet access in the home has had a positive impact on their child's grades. Khan Academy offers a personalized learning experience which includes over 5,000 free educational videos and 100,000 practice problems, in areas from basic Math to college level Biology and Art History. Khan Academy is helping kids do better in school and is preparing them to compete for 21st century jobs.

Comcast & NBCUniversal Provide Unprecedented Olympics Coverage

Whether XFINITY customers wanted to watch the games live on TV, catch up via On Demand, stream them online, or enjoy them on the go, XFINITY had them covered with unprecedented access to NBCUniversal's coverage of the Games.

For the first time ever, NBC streamed more than 1,000 hours of coverage featuring every sporting event on either NBCOlympics.com or via the NBC Sports Live Extra app – and a Comcast ID got you access.

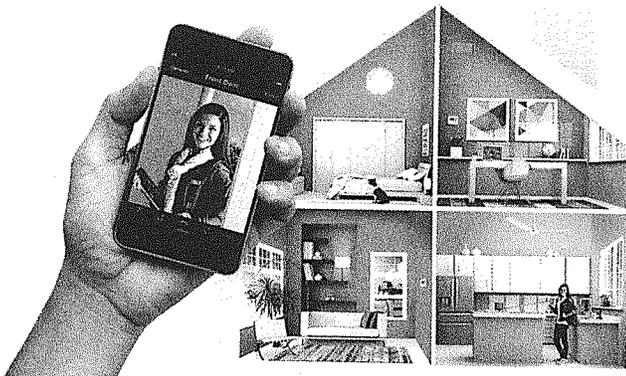

The focus of our Sochi Olympics coverage fell into three categories:

Content: With five linear TV networks, highlights and content on XFINITY On Demand, live online streaming and the NBC Sports Live Extra app with digital-only programs like Gold Zone and Olympic Ice, customers were able to experience every moment of the Games.

Control: Customers were able to control how, when and where they watched. The XFINITY Viewer's Guide at xfinity.com/NBCOlympics helped customers easily find what was on, check where to watch, schedule their DVR and keep up with the day's best moments. The sports app and NBC Sports Live Extra app allowed customers with the X1 Platform to keep up with the Games and live stream the events right on their TV. Plus, customers could catch up or replay the highlights the next day with XFINITY On Demand.

Mobility: Customers who weren't able to enjoy the Olympics at home didn't have to worry! XFINITY customers could use their mobile devices to live stream the games via the NBC Sports Live Extra app. Additionally, Comcast offered complimentary access at all XFINITY WiFi hotspots for the duration of the games, so customers and non-customers could keep up with the action when they were out and about at many of their favorite places around town.

How Homeowners Are Cutting Heating Bills with XFINITY Home

Nearly half of home energy use stems from lighting, heating, and air conditioning. "That's why tailoring your household energy consumption to your real, day-to-day needs can go a long way," says Bill Horrocks, Comcast Vice President of Product Management for XFINITY Home. "Settings, controls, and automated systems can help you use fewer kilowatt hours and save on your bills."

XFINITY Home – Comcast's web-based home security and automation platform – allows users to automate timing for lights and control their home's heating and air conditioning systems. After a simple online configuration process to establish settings, our customers can access this innovative service from an in-home touchscreen or through the XFINITY Home app on any Internet-connected device.

Customers can use the XFINITY Home touchscreen in their homes to check the weather, news, or sports scores. And when it's time to run an errand or take a trip, the platform makes it simple to set rules for which lights come on when, and how warm the house will be while no one is there. Supported by broadband connectivity to enable remote access and control, the platform also has a cellular back-up system that helps ensure users can always stay on top of their home energy consumption.

Energy Star reports that just by using a programmable thermostat to follow recommended temperature levels, homeowners can trim energy use by an average of 10 percent.

Comcast Newsmakers on the Road

Thousands of local officials attended the 98th Annual New Jersey State League of Municipalities Conference in Atlantic City. Comcast Newsmakers was also on site, taping more than 60 interviews with officials from across the Garden State.

He's joined by Comcast Newsmakers host Candace Kelley and (standing from left) Comcast Government Affairs Directors Fred DeAndrea, Charles Smith and Rob Clifton.

Sportsman Channel's Hunt.Fish.Feed Luncheon

Comcast teamed up with The Sportsman Channel and Lunch Break in Red Bank, to provide a hot lunch for Lunch Bank's clients. Lunch Break is a community-based organization that provides food, clothing and fellowship to community members in need.

More than a dozen Comcast employees, Lunch Break staff and volunteers along with executive chef Scott Leysath, who hosts the Sportsman Channel show "Dead Meat", prepared and served 80 hot lunches on site and packed another 25 for delivery to the homebound that day.

Comcast Marketing Manager Chris Toal serves dessert to a luncheon guest.

Comcast employees, Lunch Break staff and volunteers and representatives from The Sportsman Channel donned aprons and manned the serving line.

Chef Scott Leysath (2nd from left), Host of The Sportsman Channel show "Dead Meat," with Lunch Break staff including Executive Director Gwendolyn Love (far left).

Comcast NBCUniversal: 2013 Outstanding Corporate Partner by OCA - Asian Pacific American Advocates

OCA - Asian Pacific American Advocates, a national organization dedicated to advancing the social, political, and economic well-being of Asian Pacific Americans (APAs), as well as the promotion of supplier diversity among its corporate partners, selected Comcast NBCUniversal to receive its 2013

Outstanding Corporate Partner Award. The distinction recognizes Comcast NBCUniversal for its demonstrated commitment to diversity and to partnering with OCA on community investment efforts. Comcast has regularly supported the organization's signature events and local chapters around the country and, through Comcast Newsmakers, has helped advance its awareness efforts. Since 2008, the Comcast Foundation has contributed to OCA's 10-week internship program for APA college students in Washington, D.C. Comcast NBCUniversal is also a member of OCA's Business Advisory Council, which provides financial, professional, and strategic guidance to OCA.

Comcast Named Top 50 Company for Civic Engagement

Comcast was recognized as one of the top 50 community-minded companies in America. This ranking was announced by The Civic 50, a comprehensive survey of S&P 500 companies that best use their time, talent, and resources to improve the quality of life in the communities where they do business.

The Civic 50 was conducted by The National Conference on Citizenship and Points of Light, leading experts on civic engagement, in partnership with Bloomberg News. Companies were evaluated on several criteria, including how they engage with the communities they serve and institutionalize these practices in their corporate culture.

As Comcast this year celebrates its 50th anniversary, we are honored to receive this distinction - and grateful to all of our employees, and their incredible generosity.

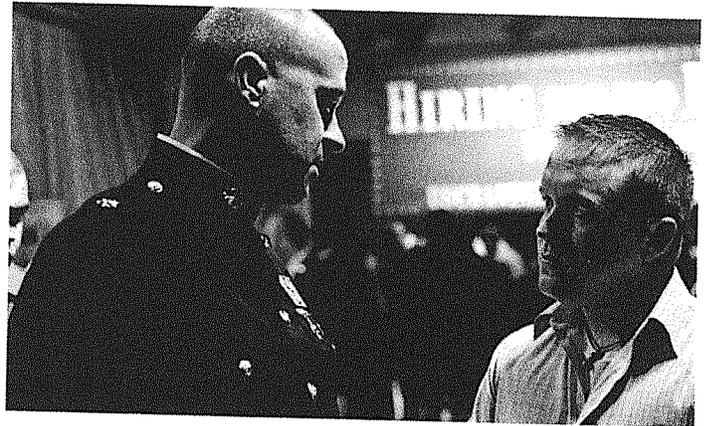

To learn more about The Civic 50 and to see the full list, visit www.Civic50.org.

Latinas Leading the Way

Pictured L to R: Comcast Director of Community Investment Kimberly Smith and Comcast Manager of Government Relations Molly Adams with the LUPE Fund President Martha Bahamon, at LUPE's Young Latina Leadership Conference held at Seton Hall University. Comcast was a sponsor of the one-day conference which drew 150 attendees and featured educational workshops on Financial Literacy, Leadership and Professional Development, Job Seeking Skills, and Branding Yourself in Social Media.

Comcast & NBCUniversal Meet Commitment to Hire 2,000 Vets 2 Years Ahead of Schedule

Comcast and NBCUniversal have hired 2,000 veterans since January 2012, achieving the company's veteran hiring commitment almost two years ahead of schedule as part of its ongoing partnership with the U.S. Chamber of Commerce Foundation's "Hiring Our Heroes" initiative.

"Hiring Our Heroes," which launched in March 2011, is a nationwide effort to help veterans, transitioning service members and military spouses find meaningful employment. Comcast's commitment is part of the National Chamber Foundation and Capital One's Hiring 500,000 Heroes campaign, the largest private sector commitment of its kind with over 1,200 businesses of all sizes involved, including Comcast and NBCUniversal which have supported the program since its inception.

Comcast Business Named Fastest Growing Ethernet Provider

COMCAST BUSINESS

Comcast Business announced that it was named the fastest growing Ethernet provider on Vertical Systems Group's 2013 U.S. Carrier Ethernet Leaderboard. Comcast is

ranked in eighth position on the research firm's latest Leaderboard based on year-end 2013 U.S. business Ethernet port share results. Vertical Systems Group is recognized worldwide as a leading market research firm and its Leaderboard is the industry's foremost benchmark for measuring Ethernet provider market presence based on billable retail port installations.

This latest industry recognition of Comcast's Ethernet market momentum follows the company being named the Metro Ethernet Forum's (MEF) Service Provider of the Year in its 2013 Carrier Ethernet Awards for North America. The MEF also announced last year that Comcast Business was the first service provider in the world to achieve MEF CE 2.0 Certification, an industry milestone.

As the only new entrant on the LEADERBOARD, Comcast Business has capitalized on businesses moving to Ethernet with significant customer traction across a number of key vertical markets in the past year, including:

Healthcare: hospitals, clinics and physician networks such as Utah Cancer Specialists, Inspira Health Network and Grady Health System are using Comcast Business Ethernet to drive digital healthcare initiatives like telemedicine and electronic medical records.

Professional Sports: teams across multiple sports, including the Oakland Athletics and Denver Broncos, are adding Comcast Business Ethernet to their rosters for more scalable Internet access to support staff, media and a more connected game day experience for fans.

Hospitality: hotels, property management firms, bars and restaurants such as McMenamins, Hersha Hospitality Group, Raymond Management Company and Hawthorn Suites are installing Comcast Business Ethernet to deliver a better guest experience.

Incubators and tech hubs: business incubators, tech hubs and business communities, including Cambridge Innovation Center, 1776 (Washington, D.C.) and Pease International Tradeport, are upgrading to Comcast Business Ethernet to provide a scalable technology platform to support growing businesses.

"Our deep network reach, extensive service availability and proactive customer support down to the premises all have made Comcast Business Ethernet the choice for enterprise customers looking for a flexible, scalable and cost-effective network solution," said Scott Cassell, senior director, Product Management, Comcast Business. "As our Ethernet business continues to accelerate, we look forward to providing even more customers with an alternative to slower technologies from legacy providers."

Delivered over the company's next-generation, all-IP network that is in 20 of the 25 largest markets in 39 states and Washington, D.C., the Comcast Business Ethernet portfolio includes Ethernet Private Line, Ethernet Virtual Private Line, Ethernet Network Services and Ethernet Dedicated Internet services delivered over fiber and Hybrid Fiber Coax (HFC) at speeds from 1 Mbps to 10 Gbps.

Comcast NBCUniversal & The Arc Launch Multi-Million Dollar National Partnership

The Arc, an advocate for the rights of the disabilities community, and announced they have formed an exciting new national partnership to support and expand digital technology opportunities for people with intellectual and developmental disabilities (I/DD).

Through a three-year commitment, Comcast and NBCUniversal will provide The Arc with \$3.7 million in cash and in-kind support, including airtime, to promote The Arc's public service announcements on cable and broadcast channels and xfinity.com. The Comcast Foundation is also providing \$400,000 to support The Arc's national digital training program and improve technology access and services by launching up to 12 Comcast and NBCUniversal Digital Literacy Learning Labs in major metropolitan U.S. cities.

The Arc will use the new funding to design an online resource center for cataloging and rating apps, software and other digital resources. The 700 local chapters of The Arc nationwide will participate in designing and contributing resources to the online resource center.

Digital literacy is an important area of focus for the disabilities community and The Arc in this increasingly digital and online world. The majority of people with I/DD have limited or no access to contemporary and comprehensible information and communication technologies. In The Arc's nationwide survey, Family and Individual Needs for Disability Supports ("FINDS") in 2010, only 32 percent of people with I/DD were reported to be using computers; 13 percent communication devices; 4 percent GPS; and 6 percent video communications. This partnership will focus on assisting people with I/DD to gain access to and make effective and safe use of the Internet, including social media.
