Subject: Permaculture Design Certificate Course

**Permaculture Design Certificate Course
Registration Ends May 2nd**

"The aim is to create systems that are ecologically sound and economically viable, which provide for their own needs, do not exploit or pollute, and are therefore sustainable in the long term. Permaculture uses the inherent qualities of plants and animals combined with the natural characteristics of landscapes and structures to produce a life-supporting system for city and country, using the smallest practical area."

- Bill Mollison, Permaculturist

Wayne Weiseman, a New Jersey native and current Director of The Permaculture Project LLC, will bring his 8-Day Permaculture Design Certificate Course back to NJ after a 2 year hiatus. It will be taught over two long weekends, May 16-19 and June 6-9 at Duke Farms in Hillsborough, NJ. Do not miss this unique opportunity to study with Wayne, one of the premier permaculture educators. **The deadline to register is Friday, May 2nd.**

Co-Sponsored by NOFA-NJ, Duke Farms, and The Permaculture Project LLC, this 8-day intensive Permaculture Design Certificate Course will teach the concepts and themes of Bill Mollison's Permaculture Design System. Students will gain a

working understanding of ecologically-based planning, site design and management that can be applied in urban or rural settings, on your farm, at your single family home, or for an entire community. You will be provided with hands-on opportunities to apply the principles in practical situations for any landscape no matter the scale.

Call 908-371-1111 with questions, or go to: [Permaculture Design](#) for more information and to register.
