NJDEP Case #89-10-05-0923
NJDEP PI #007190

Dear Neighbor:

This letter is being sent in accordance with the New Jersey Department of Environmental Protection (NJDEP) regulations for notification and public outreach. I am writing on behalf of Lukoil North America LLC (LNA) to inform you that we are investigating and remediating environmental contamination (collectively, the Work) at the above-captioned site (the Site). LNA agreed to complete the Work, which was formerly conducted by our predecessor(s). The Work is being performed under rules established by the NJDEP, which has assigned case number 89-10-05-0923. Based upon our investigation, the impacted ground water and/or soil is within the property boundary of the above-captioned station. The environmental investigation is proceeding in accordance with NJDEP requirements.

The Work was prompted by the presence in soil and/or ground water of the following compounds associated with gasoline: benzene, toluene, ethylbenzene, xylenes, (BTEX), methyl tertiary-butyl ether (MTBE), tertiary-butyl alcohol (TBA), and total volatile organic compounds (Total VOCs). The Work at the Site currently involves collecting ground water samples.

During the course of the Work, we will continue to provide you with periodic updates about our progress. Copies of reports regarding the Work will also be made available to your municipality upon request. LNA is working closely with EnviroTrac Ltd. of Burlington, NJ on this matter under the direct supervision of a Licensed Site Remediation Professional (LSRP). If you have any questions, please contact LNA at 1-877-817-0168 EXT. 5512 or the EnviroTrac LSRP of record for the Site at 609-379-3283.

Sincerely,

EnviroTrac Ltd.
