Subject: JCP&L Topic of the Month - Call Before You Dig

The Topic of the Month for March addresses the importance of dialing 811 before you begin any projects that require digging. 811 is the federally mandated, national phone number, and will help to prevent unintentionally hitting underground utility lines.

The attached file will provide more information on this process.

(See attached file: 811Article.pdf)

Call Before You Dig

The federally mandated, national phone number, 811, helps prevent you from unintentionally hitting underground utility lines. Before you begin projects that involve digging, dial 811 to locate underground electric, gas or other utility lines. Digging without this information can cause power outages, and it's extremely dangerous.

Simply tell the 811 operator where you're planning to dig and what type of work you will be doing, and your local utility companies will be notified. Within a few days, they will mark the location of underground lines. Please call at least three days in advance to avoid unnecessary delays to your project. Know what's below – Call before you dig! For more information, visit www.call811.com.
