Re: Design of Erosion Control along  
Flanders-Netcong Road, Mt. Olive  
Township, Morris County, NJ  
CW Project No. NJ-M-MO-120

Dear Ms. Lashway:

We have been engaged by Morris County to prepare plans for construction of erosion control measures along Flanders-Netcong Road in Mt. Olive Township, from approximately 700 feet north of Route 206 to approximately 1,000 feet north of Route 206. In order to prepare these plans, it will be necessary for us to make detailed field measurements of the existing roadway and surrounding areas up to 200 feet from the roadway, as well as delineate wetlands areas.

Some of this work will require our personnel to enter private property along the road. This site visit will involve a visual inspection, taking survey measurements and possibly minor soil disturbance for wetlands delineation using a maximum 4" diameter hand auger.

We anticipate that our field work will begin around April 13, 2015 and will continue intermittently for approximately three weeks.

If you have any questions, please do not hesitate to contact this office.

Very truly yours,

CHERRY, WEBER & ASSOCIATES, P.C.

Peter W. Olieman, P.E.
