NOTICE OF HERBICIDE APPLICATION

Date: 8/24, 2016

Dear Property Owner,

Public Service Electric and Gas Company (PSE&G) owns the high voltage electric transmission right-of-way located on your property. The electric transmission lines on this right-of-way are essential for PSE&G to meet its commitment to provide safe, adequate and reliable electric utility service to consumers throughout New Jersey. Maintaining proper tree clearance from the power lines is absolutely necessary to assure:

- The continued safety of homeowners living near the transmission power lines,
- The safety of PSE&G employees and contractors working on the power lines, and
- The reliability of the electric utility system.

The overgrown vegetation on the PSE&G Right-of-Way now requires maintenance of the right-of-way. As such, NELSON TREE SERVICE, a private contractor working for PSE&G, will herbicide brush and woody vegetation on PSE&G's Right of Way.

This work will begin; weather permitting, on or about Aug 24 - Sept 15

If you have any questions or concerns, please telephone: Larry S. Porch Sr., at 732-496-5931.

Thank you for your understanding,
